

## Flame Tests Make-Up or Grade Improvement Assignment Physical Science 246

**DUE:** *Absolutely NO LATER than Wednesday, November 5, 2008*

**Subject:** The Chemistry of Fireworks

### **Background:**

There is a lot of chemistry involved with the science of fireworks. Chemistry is involved with everything from how they are launched into the air to the types of sounds and the colors of their explosions. These are the things that you will research

### **Assignment:**

Write two FULL pages about the chemistry of fireworks. You will submit a paper copy and an electronic copy (email or somehow give me the file) of the text portions of the assignment so I may submit your paper to turnitin.com.

### **Guidelines:**

1. Two FULL pages of text
  - a. 1.5 inch spacing between paragraphs
  - b. 1 inch margins around all 4 sides (you will have to change them in Microsoft Word).
  - c. You must use 12 pt Times New Roman font.
  - d. No less than 2 different sources (no Wiki)
  - e. No headings on either page of the body
2. Cover page
  - a. Just like a lab cover page
3. Bibliography - you don't need to use noodle tools.
  - a. Must include all information required for your bibliography as in English assignments.
